

# Determining Legacy or CurrentGen

Unsure if your County uses CaseWorks Legacy or CaseWorks CurrentGen? Finding out which your County uses is quick and easy and will help inform a few things in your CaseWorks experience.

## How to Determine if your County uses CaseWorks Legacy or CurrentGen:

Open an Edge browser and navigate to any CaseWorks homepage. At the top of your browser, look to see if you have an Internet Explorer Compatibility icon as shown below:

## What Does This Mean for Me?

Every 6-8 years, CaseWorks provides platform upgrades as part of CaseWorks continuous delivery model to ensure the software is running on the most up to date SharePoint platform. Many CaseWorks Counties have already moved to the upgraded platform, which we call, "CurrentGen". The CurrentGen environment has the most up to date feature releases, which is why our User Manuals are currently split between Legacy and CurrentGen environments. Simply navigate in the CaseWorks Knowledge Base to the User Manual that corresponds to your CaseWorks environment to review information relevant to your County.

Soon all Counties will be on the CurrentGen platform and Legacy User Manuals will no longer be necessary. Thank you for your partnership during this transition!
